Rental Skier Type Chart

Guidelines for binding release settings for Mt. Baker Rental Department

Type 1

Cautious skier at lighter release/retention settings

- Ski conservatively
- Prefer slower speeds
- Prefer easy, moderate slopes
- Favor lower than average release/retention settings. This corresponds to an increased risk of inadvertent binding release in order to gain increased releasability in a fall
- Type 1 settings apply to "entry level skiers uncertain of their classification"

Type 2

Moderate skiing at average release/retention settings

- Ski moderately
- Prefer a variety of speeds
- Ski on varied terrain, including most difficult trails
- All skiers not classified as Type 1 or Type 3.

Type 3

Aggressive skiing at higher release/retention settings

- Ski aggressively
- Normally ski at high speeds
- Prefer steeper and more challenging terrain
- Favor higher than average release/retention settings. This corresponds to decreased releasability in a fall in order to gain a decreased risk of inadvertent binding release.
